

# WE'RE LOOKING FOR HEROES TO HIRE!

Consid is an IT and management consultancy that specializes in software development and implementation projects – we are working with both the technology and how our clients can make money on it. We streamline and optimize our clients' operations and profitability and provides the skills they lack. At Consid you will be challenged in your professional role. We are looking for more than just good grades. Our goal is to make a real difference for our clients and stand out relative to our competitors. To succeed in this context, your talents and qualities are important. Employees with many different backgrounds - engineers, economists, mathematicians, computer scientists, and graphic artists - thrive and develop at Consid.
